

FEDERAL SCIENTIFIC STAFFING SERVICES

At Astrix, our vision is to provide our clients the necessary scientific domain, application expertise and talent required to achieve true scientific excellence. We are a staffing and professional services organization focused on serving the federal government and scientific community since 1995.

Working with both federal agencies and government contractors, Astrix provides professionals from a variety of disciplines who offer the necessary experience, professionalism and dedication required to meet your specifications. Our team specializes in a number of disciplines, including: Laboratory Specialists, Engineers, Information Technology, Biology, Chemistry, Medical and Clinical.

Astrix will assist your laboratory by increasing efficiency while controlling your costs. We recruit and place a full range of scientists, specialists and technicians. We truly search for, and find, the best candidates for your specific laboratory needs.

‘We strive to create value and trust in the business of science.’

- **Reduce Costs with our Contractor Transfer Program** – we have lower overhead costs than our competitors who provide program management
- **Recruiting** – we proactively search for, and find, qualified candidates
- **Payrolling** – we employ (pay and provide top-tier benefits including health insurance, 401k, PTO and more) to individuals that you identify
- **Postdoc to Contractor** – we provide you a vehicle to ensure continuity of support within your lab
- **Immigration Services** – we support and sponsor F-1 and H-1b visas, as well as, Green Cards thus reducing turnover in your lab and minimizing your training efforts and expenses
