| We bring new approaches to solving complex business problems that propel forward movement via innovative thinking, collaboration, and organizational change management. | Our team identifies challenges, gaps, barriers, and opportunities within your current environment and collaborates with you to co-create the desired future state. A comprehensive plan is specifically designed to transform end-to-end workflows and data flows, identify technology opportunities, and define user requirements. Once completed, we can lead or assist in the process of vendor solution selection to achieve the envisioned future business environment. | We assess your current technologies, creating thoughtful platform-based and data-centric strategies with an emphasis on digital readiness and smart movement to the cloud, while leveraging emerging technologies to support the business direction. | We construct pragmatic strategies and frameworks for data governance, assessments of data quality, and planning for optimized management of digital assets across the organization. |

## The Difference is in Our Methodology

### Strategic Consulting Services Methodology

We ensure successful outcomes through skilled facilitation that aligns business and technology stakeholders. Astrix's approach uses a framework of proven methods developed around our signature Strategic Consulting Services Methodology promotes collaboration and rapid decision-making while balancing people, process, and technology challenges. Evolved over hundreds of engagements, representing thousands of hours of client collaboration, our unique methodology ensures the right team, expertise, approach, and results.

## A Staged Approach for Clarity, Control, and Confidence

Projects are constructed in stages, with appropriately planned client interactions that can be one-on-one, in working meetings, or Facilitated Working Sessions. Our Methodology has been proven effective when applied from departmental-focused projects, all the way up to complex strategic and global initiatives.

## **Facilitated Working Sessions**

Facilitated interactive workshops are critical engines of our methodology. The Facilitated Working Session unifies business and technical stakeholders in a highly interactive environment that examines critical business issues and focuses on building alignment, and buy-in, via change management.

The power of these sessions emerges from the broad approach of future state envisioning that takes the view of what is possible in the future. For many participants, this is the first time they share a perspective on the end-to-end workflow and data flow of the organization.

## **Facilitated Working Sessions can be Tailored to**

## **Domain Expertise**

Astrix's engagements span Research, Preclinical, Pharmaceutical Development, Early Development and Translational, Clinical Development, Pharmacovigilance / Safety, Regulatory Affairs, and Manufacturing.

### **A Sample of the successful projects we have led for our clients:**

- Developed an Optimized Data Centric, Platform Based Technology Strategy for R&D
- Modernized Pharmacovigilance Signal Management Solution
- Developed a Successful Data Governance Strategy and Plan
- Improved CMC Processes to Empower Cell Therapy Company Growth
- Modernized Data Access that Enabled Fast-Tracking of Cell Therapeutics
- Optimized Image Management Across Pharma R&D

To learn more about these projects and others visit: <https://astrixinc.com/case-studies/>

### **The Bottom Line**

Astrix achieves success for our clients through skilled facilitation and exceptional management leadership. We work fluidly across Life Science domains from research to manufacturing. The cornerstone of Astrix's approach is a methodology, honed through hundreds of successful engagements, that emphasizes collaboration, balances people, process, and domain-specific technology challenges, to enable rapid decision-making that achieve our clients' goals.
