

Solution Brief: Astrix & Sapio Sciences

Overview: Delivering Seamless Lab Operations and Data-Driven Discovery

Astrix and Sapio Sciences have partnered to deliver a future-ready informatics solution for life sciences organizations. This collaboration combines Sapio's configurable, unified lab informatics platform with Astrix's decades of experience in scientific IT, professional services, and digital transformation. The result: streamlined, compliant, and insight-rich operations across research, development, and manufacturing environments.

Together, Astrix and Sapio help labs eliminate complexity, unify data, and empower scientists through integrated, intelligent solutions.

About Sapio Sciences: Science-Aware™ Lab Informatics for Biopharma Discovery

Company Profile

Founded in 2004, [Sapio Sciences](#) is a global provider of laboratory informatics solutions dedicated to transforming scientific workflows and accelerating discovery. Serving organizations across biotech, pharma, CRO/CDMOs, and diagnostics, Sapio combines [LIMS](#), [ELN](#), and [Scientific Data Cloud](#) into one unified platform—configurable for any lab environment.

Sapio's platform is designed to simplify complexity, unify fragmented systems, and scale with scientific needs. With operations in North America and Europe, Sapio enables organizations to drive innovation, ensure compliance, and optimize data flow from bench to insight.

Sapio Sciences serves clients globally across biotechnology, pharmaceutical, CDMO/CRO, and diagnostics sectors with capabilities across:

- Unified platform combining LIMS, ELN, and Scientific Data Cloud
- No-code/low-code configurability for rapid deployment
- Built-in compliance with GxP, HIPAA, 21 CFR Part 11, ISO 17025
- Pre-built workflows for NGS, bioanalytics, histopathology, and more
- AI-powered automation via Sapio ELaiN and integration with Sapio Scientific Data Cloud

WHY THE PARTNERSHIP MATTERS

Astrix brings over 30 years of experience helping scientific organizations implement, integrate, and optimize informatics solutions. Their team of scientific IT experts, informatics engineers, and compliance professionals delivers:

- Business process optimization and change management
- Scientific informatics consulting and strategy
- System integration, validation, and lifecycle management
- Staff augmentation and ongoing support services

EMPOWER SCIENCE WITHOUT LIMITS

A seamless experience for scientists and stakeholders. Our partnership is designed to help customers do what matters most: focus on the science.

- **Scientific Expertise:** Astrix brings deep knowledge in biotech, pharma R&D, diagnostics, and bioprocessing to align Sapio with scientific and regulatory needs.
- **End-to-End Delivery:** From planning and data migration to GxP validation and training, Astrix manages the full process with precision.
- **Regulatory Strength:** Expertise in GxP, GMP, CLIA, and FDA standards so every deployment is audit-ready.
- **Flexible Integration:** Cloud-ready and platform-agnostic, Astrix connects Sapio to instruments, ERP systems, and data environments.
- **Ongoing Optimization:** Post-go-live support includes change management, performance tuning, and continuous enhancement.

REAL VALUE FOR CLIENTS

A seamless experience for scientists and stakeholders. Our partnership is designed to help customers do what matters most: focus on the science.

- **Aligned with Science:** Consultants understand diagnostics, antibody discovery, NGS, and more, ensuring tailored Sapio implementations.
- **Compliance Built-In:** GxP validation and GMP-ready setups simplify regulatory success.
- **Scalable Architecture:** Designed for lab-to-cloud data flow, AI/ML readiness, and multimodal data.
- **Lasting Partnership:** Support goes beyond launch, adapting to your evolving needs.

FAQS

• What do Astrix and Sapio Sciences offer together?

An end-to-end lab informatics solution combining Sapio's unified platform with Astrix's informatics strategy, implementation, and support expertise.

• Who is this partnership ideal for?

Life sciences organizations seeking to unify lab data, streamline workflows, and modernize informatics with built-in compliance.

• How does Astrix enhance Sapio implementations?

Astrix provides domain-aligned consulting, project leadership, validation services, and long-term support to ensure Sapio is successfully deployed and optimized.

• What industries benefit most?

Pharmaceutical, biotechnology, diagnostics, and CDMO/CRO labs with complex regulatory, integration, and scaling needs.

ABOUT ASTRIX

Founded over 30 years ago, Astrix is a trusted partner for scientific IT and informatics transformation. Serving clients across the pharmaceutical, biotech, public health, and environmental sectors, Astrix helps bridge science and technology through:

- Scientific informatics strategy and execution
- Laboratory systems integration and support
- GxP and regulatory validation
- Staffing and managed services for scientific IT

With deep technical knowledge and a commitment to enabling discovery, Astrix helps labs simplify complexity and deliver better science.
